

**SAFETY, HEALTH AND ENVIRONMENTAL
MANAGEMENT SYSTEM**

POLICY STATEMENT

OCCUPATIONAL HEALTH AND SAFETY

At Force Equipment, our health, safety, environment and community responsibilities forms the foundation to our business and foundation to our people.

Our commitments

We are committed to effective implementation of our OHS policy and to continual improvement in our OHS performance.

Force Equipment is committed to continuing to reduce Loss Time Incidents and Total Recordable Incident Rates.

Health and Safety

Workplace injuries can be prevented and with the input from every staff member, we aim to eliminate workplace incidents and create a safety culture where employees take ownership over risks, identify and take part in their control.

Environment

In our operations we continually aim to lessen our waste and use our resources more effectively. We will implement systems to reduce harm to the environments that we operate within.

Training

Our training systems will ensure personnel are equipped with the skills to carry out their work scope. Force Equipment offers opportunities for employee professional development and learning pathway progression.

Jason John
CEO

Our actions

To meet our OHS commitments, we will set measurable objectives and targets. Our Safety Management System will be continually reviewed and will include the involvement of all tiers of staff in its continued implementation.

We will provide training and induction systems to ensure employees, contractors and visitors to our workplaces have the skills to operate in a safe manner.

Force Equipment will comply with all relevant legislative and industry standards, and other requirements under our business jurisdiction.

We will continually identify, assess and implement controls for risk and always encourage and seek input from every staff member.

A safety culture where safety is paramount to every person.

Richard McGarr
